Objective

Highly motivated and detail-oriented programmer with expertise in JavaScript, React, Node.js, and Python, seeking to leverage my skills in developing innovative web applications and efficient backend solutions. Proficient in creating responsive, user-friendly interfaces and integrating APIs to deliver seamless user experiences. Currently expanding my knowledge in TypeScript, MQL5, and Web3 development to explore emerging technologies. Dedicated to building robust, scalable solutions and contributing to dynamic, forward-thinking teams.

Experience

- **Kabadi tech private limited**   02/01/2023 - 15/07/2023
  Frontend developer intern
  Built a dynamic website using React, leveraging hooks, fragments, and advanced react features for enhanced functionality.
  Designed user interface in figma and integrated API using Axios to ensure seamless data flow.

- **Deloitte USI**   20/10/2023 - 1/10/2024
  DC Analyst
  Contributor to the frontend using React, enhancing the application's user interface and overall performance.
  Developed backend for a medical screening project, handling data, CRUD operations and APIs.

- **Easybyts**   12/08/2024 -
  Full Stack developer
  Developed and enhance the Orders section, including order details, using features such as drop-down, structured forms, and dynamic status updates with color-coded indicators.
  Integrated APIs for data fetching, implemented real-time status updates to ensure seamless user interaction.

Education

- **Nnamdi azikwe university**
  Parasitology

Skills

- Programming Languages: JavaScript, Python, TypeScript, HTML5/CSS3, Sass,
- Frameworks and Libraries: React.js Node.js Express.js Mui. Tailwind CSS
- Tools and Platforms: Git and GitHub NPM Visual Studio Code Postman you
- Databases: MongoDB, Postgresql
- Soft Skills: Problem-solving, Communication and collaboration, Attention to detail, Self-motivation and adaptability.
